

**GOVERNMENT OF INDIA
NATIONAL COMMISSION FOR WOMEN**

**BID DOCUMENT
(REQUEST FOR PROPOSAL (RFP))**

**For
AI-Assisted Complaint Management System**

For Selection of an Implementation Agency for design, development, deployment, migration, training and support of a new complaint management system with governed AI assistance.

Field	Details
Tender Reference No.	12-2/1/2026-Computer Cell (NCW)
Date of issue	17/08/2026
Issuing Authority	National Commission for Women (NCW)
Mode of Submission	GeM as notified by NCW
Bid Submission Deadline	07/09/2026 at 15:00 hrs IST
Implementation Period	Up to 9 months from award
Support Period	5 years AMC / O&M after go-live and hypercare
Hosting	Production and DR cloud infrastructure to be provided and paid for by NCW
Bid Queries / Contact	IT Cell, NCW Email: itcell.ncw@gov.in

Table of Contents

15. General Terms and Annexures

1. Data Sheet

Parameter	Simplified Requirement
Procuring Authority	National Commission for Women (NCW)
Nature of Procurement	AI-assisted complaint management platform for NCW.
Selection Method	QCBS: Technical 70%, Financial 30%
Minimum Technical Score	70 out of 100.
Bid Validity	180 days from the last date of bid submission.
Bid Structure	Two-cover system: Technical Bid and Financial Bid. No price information shall be included in the Technical Bid.
EMD Amount	Rs. 2,00,000/- (Rupees Two Lakh Only)
Performance Security	5% of total contract value, within 15 days of issuance of LoA
GST Applicability	GST to be quoted separately; all other taxes on bidder
Evaluated Bid Price	Implementation price plus the total quoted AMC/O&M price for all five years, excluding GST.
Implementation	Discovery, development, migration, testing, training, deployment and go-live within 9 months.
Support	90 days hypercare plus 5 years AMC / O&M support.
Hosting	NCW shall provide production and DR cloud / government hosting environment. Vendor shall deploy and operate the application on NCW-provided infrastructure.
Cloud Costs	Cloud, storage, backup, bandwidth, monitoring tools provided by cloud, SMS/email gateway costs and DR infrastructure costs are outside vendor price.

Key Dates:

S. No.	Event	Date / Details
1	Publication of RFP on GeM/CPMP	[17/08/2026]
2	Start of Download of RFP Document	[17/08/2026] 17:00 hrs IST
3	Last Date for Pre-Bid Queries (by e-mail)	[27/08/2026] 17:00 hrs IST
4	Pre-Bid Conference (virtual/physical)	[28/08/2026] 11:00 hrs IST
5	Response to Pre-Bid Queries (uploaded on portal)	[31/08/2026]
6	Last Date and Time for Bid Submission	[07/09/2026] 15:00 hrs IST
7	Opening of Technical Bids	[07/09/2026] 15:30 hrs IST
8	Technical Presentation / Demo (shortlisted bidders)	To be intimated separately
9	Opening of Financial Bids (qualified bidders)	To be intimated separately

Earnest Money Deposit (EMD): Bidders shall submit an EMD of Rs. 2,00,000/- (Rupees Two Lakh Only) in the form of a Demand Draft / Banker's Cheque drawn in favour of "Pay and Accounts Officer, National Commission for Women", payable at New Delhi. MSME / Start-up registered entities are exempted as per Government of India guidelines subject to submission of valid registration certificate.

1.1 Bid Submission, Validity and Clarifications

- i. Bids shall be submitted electronically in two separate covers: (i) Technical Bid and (ii) Financial Bid, in the manner prescribed on GeM.
- ii. The Technical Bid shall contain the signed bid submission form, EMD or exemption proof, eligibility documents, technical proposal, compliance sheet, project credentials, key-personnel details and authorisation of the signatory. It shall not contain any price or commercial information.
- iii. The Financial Bid shall be submitted only in the prescribed format. Inclusion of price information in the Technical Bid, a conditional financial quote, or failure to quote a mandatory component may render the bid non-responsive.
- iv. The bid shall remain valid for 180 days from the last date of submission. NCW may request an extension of validity; the bidder may decline without forfeiture of EMD, but shall not alter its price or conditions while granting the extension.
- v. All pages/documents uploaded by the bidder shall be signed digitally or otherwise authenticated by the authorised signatory. Power of Attorney, Board Resolution or other valid authorisation shall be uploaded.
- vi. Pre-bid replies, corrigenda and amendments published on the notified portal shall form part of the Bid Document. Bidders shall check the portal and incorporate them in their bids.
- vii. NCW may seek written clarifications or verification of documents after opening of bids, but no clarification shall be used to permit a material change in scope, eligibility, technical offer or price after the submission deadline.'

2. Background and Objective

NCW receives and processes complaints relating to deprivation of rights of women and injustice to women. The Complaint and Investigation Cell requires a modern system to register complaints, route them, generate letters/notices, track ATRs, support hearings, close cases and generate MIS reports.

The objective is to build a new complaint management system with AI-assisted features that reduce repetitive work such as first-pass reading, categorisation, summarisation, draft BTR preparation, reminder tracking, document generation and MIS preparation.

The system shall remain a human-led administrative and quasi-judicial workflow. AI shall only assist authorised officers. AI shall not decide, approve, close, dispatch or escalate any case on its own.

Note: This new Complaint Management Portal shall also be provided to all State Women Commission (SWC) with independent logins for SWC officers. Only concerned SWC shall have access to complaints received by that SWC, just like only NCW shall have access to complaints received by NCW. SWC portal access shall be through their portal or through NCW portal white labeled as respective SWC portal so that the complainant does not know that the backend is NCW portal.

3. Scope of Work

3.1 In Scope

- Discovery workshops with NCW users and preparation of a Functional Requirement Specification (FRS).
- Design and development of a new complaint management platform with role-based user access.
- Complaint intake for online and offline complaints, including scanned documents and basic multilingual support.

- Scrutiny, registration, allocation, BTR preparation, Member approval, ATR tracking, hearing support, Jan Sunwai support, closure and archival workflows.
- AI assistance for summarisation, classification suggestions, duplicate detection, draft BTR, draft letters/notices, chronology, ATR gap analysis and MIS insights.
- Data migration from the existing NCW complaint portal at cutover, based on data provided / made accessible by NCW.
- Dashboards and MIS reports for pendency, ageing, categories, state/district, ATR compliance, hearings, closures and user workload.
- Integration with email/SMS gateways and other government systems as feasible through available APIs.
- Security controls including RBAC, MFA for internal users, audit logs, encryption, VAPT and compliance documentation.
- Training, user manuals, administrator guide, SOPs, hypercare and AMC support.

3.2 Out of Scope

- Procurement, payment, ownership or sizing of cloud infrastructure, DR infrastructure, SMS gateway, email gateway, bandwidth, network or end-user hardware.
- Penalties or service credits for cloud downtime, gateway issues, NIC/MeghRaj platform constraints, NCW network issues, or failures of external systems not controlled by the vendor.
- Mobile application development unless separately approved as a change request.
- Autonomous AI decision-making, autonomous dispatch, autonomous escalation, or autonomous closure.
- Manual data entry of historical paper records not already digitised, unless separately priced and approved.

4. Functional Requirements

Module	Core Requirement
Complaint Intake	Capture complainant, victim, respondent, incident details, documents, language, mode of receipt and acknowledgement generation.
Scrutiny	Assist scrutiny desk with completeness checklist, mandate/non-mandate suggestion and draft non-mandate reply; final action by officer.
Registration & Allocation	Generate complaint/file numbers and route to concerned officer based on configurable allocation rules.
BTR & Approval	Provide editable AI-assisted summaries, issue statements, chronology and draft BTR; submit to Member/Competent Authority for approval.
ATR Tracking	Track ATR requests, due dates, reminders, uploaded ATRs, pending reports and escalations after approval by authorised officer.
Hearing & Counselling	Schedule hearings, generate notices, record attendance and outcomes, upload proceedings and update case history.
Inquiry / Fact Finding	Create IC/FFT records, capture ToR, upload notes/reports and route final report for approval.
Jan Sunwai	Bulk listing, cause list, stakeholder notifications, proceedings recording and resolution upload.
Closure & Archive	Closure category, closure note, intimation letter, read-only archive and full case history.
Dashboards & Search	Role-wise dashboards, advanced search, export to Excel/PDF/Word and standard MIS reports.

4.1 Complaint Lifecycle - Simplified Timeline

Stage	Expected System Support	Officer Control
Receipt	Register complaint and generate acknowledgement.	Scrutiny desk confirms data for offline entries.
Scrutiny	Checklist, mandate suggestion and draft reply.	Scrutiny officer decides.
Registration	File number and allocation suggestion.	Officer / administrator confirms.
BTR	AI-assisted draft and document summary.	Counsellor / JTE edits and submits.
Approval	Case brief for Member / Chairperson.	Competent Authority approves / returns.
ATR	Due-date tracking and reminder draft.	Officer approves dispatch / escalation.
Hearing	Notice draft, cause list and proceedings.	Authorised officer approves notices and records outcome.
Closure	Closure note and intimation draft.	Authorised officer approves closure.

5. AI Assistance and Human Control

AI Assistance Area	Permitted Output	Mandatory Human Control
Citizen / Intake Assistance	Form guidance, missing fields, broad category cues and duplicate flags.	User/officer reviews before submission.
Scrutiny Assistance	Mandate suggestion, checklist and draft non-mandate reply.	Scrutiny officer accepts, edits or rejects.
BTR Assistance	Complaint summary, chronology, issue statement and draft BTR.	Counsellor/JTE edits and submits.
Decision Brief	Background note, open issues and suggested next steps.	Member/Chairperson independently decides.
ATR Assistance	Reminder draft, overdue list and ATR gap summary.	Officer approves dispatch; Competent Authority approves escalation.
Hearing / Inquiry Assistance	Chronology, correspondence digest and evidence checklist.	Hearing/IC/FFT team reviews before use.
Closure Assistance	Suggested closure note and intimation letter.	Case owner approves closure and dispatch.

5.1 AI Guardrails

- AI output must be clearly labelled as AI-assisted and editable.
- AI output shall not become an official case record until reviewed and approved by an authorised officer.
- The vendor shall not train or fine-tune any public or third-party model on NCW complaint data without written approval of NCW and compliance with applicable law.
- Complaint data shall not be stored on any server outside the NCW-approved hosting environment, except where an external AI API is explicitly approved by NCW with data-residency and no-retention safeguards.
- The system shall log AI invocations, generated output, officer edits/approval/rejection and final text used.

6. Technical and Hosting Requirements

- The solution shall be web-based, responsive, secure and role-based.
- The architecture should be modular and API-friendly, but NCW shall not be required to maintain complex integrations without vendor support during AMC.
- Production and DR infrastructure shall be provided by NCW on NIC/MeghRaj, MeitY-empanelled cloud or other Government of India approved hosting environment.
- Vendor shall deploy, configure and maintain the application on the NCW-provided environment, subject to access and permissions made available by NCW/cloud provider.
- Vendor shall recommend sizing and scaling requirements, but performance degradation caused by inadequate or unavailable NCW-provided infrastructure shall not be treated as vendor default.
- All data shall reside in India. The vendor shall follow MeitY/NIC/cloud provider policies applicable to the hosting environment.
- All source code, configuration documents, deployment scripts and database schema shall be handed over to NCW at agreed milestones and at exit.

6.1 Performance Expectations

- The application should support expected NCW complaint workload and reasonable concurrent usage as finalised during discovery.
- Search, dashboard and AI response performance shall be measured during UAT on the actual infrastructure provided by NCW.
- Performance issues shall be jointly classified as application-related, infrastructure-related, gateway-related or external-service-related. Only application-related defects attributable to the vendor shall be treated as vendor responsibility.

7. Security and Compliance

- Role-Based Access Control for complainants, NCW staff, Members, Chairperson, police/authority users, administrators and auditors.
- MFA for internal NCW users and administrators, subject to available authentication infrastructure.
- Encryption in transit and at rest using government-accepted standards.
- Comprehensive audit trail for creation, update, view, approval, rejection, dispatch, closure, export and AI invocation.
- VAPT before go-live by a CERT-In empanelled auditor or any other auditor approved by NCW; critical and high application vulnerabilities to be fixed before go-live.
- Incident reporting for data breach, system compromise, unauthorised access or AI misuse. NCW will decide any statutory reporting obligation.
- Compliance with applicable provisions of the IT Act, CERT-In directions, DPDP Act, NCW Act, RTI record needs and Government of India data-residency requirements.

8. Implementation, Acceptance and Payments

Milestone	Deliverables	Indicative Payment
M1: Discovery & FRS	Workshops, FRS, project plan, risk register, architecture and migration approach.	10%
M2: Design Sign-off	UI prototype, database design, security design, AI design, test plan and cloud sizing recommendation.	10%

M3: Core Workflow Build	Intake, scrutiny, registration, allocation, BTR, approval and basic dashboards on staging.	20%
M4: AI, ATR, Hearing, Jan Sunwai & MIS	AI assistance, ATR tracking, hearing, Jan Sunwai, closure and MIS modules.	20%
M5: Migration, Testing & VAPT	Migration trial, UAT support, performance test, VAPT remediation and training material.	20%
M6: Go-live & Hypercare Start	Production deployment, user training, go-live support and handover pack.	15%
M7: Hypercare Completion	90-day stabilisation report and transition to AMC.	5%

8.1 Acceptance Process

- Each milestone will be submitted with a short deliverable checklist.
- NCW shall provide consolidated comments within 10 working days. If comments are not received within this period, the milestone may be treated as provisionally accepted for project-progress purposes, without waiving NCW's right to seek correction of material defects later.
- At NCW's discretion, Minor defects shall not block milestone payment where the core deliverable is usable; such defects shall be tracked in an issue log for resolution.
- Go-live shall require successful UAT, closure of critical/high application defects, completion of required training and security clearance.

9. Vendor Responsibilities and Governance

9.1 Vendor Responsibilities

- Provide one Project Manager who shall be the single point of accountability from the vendor side.
- Maintain an issue tracker, project plan, risk register and fortnightly progress report during implementation.
- Coordinate with NCW users, NIC/cloud provider and gateway providers based on access and authorisation arranged by NCW.
- Provide training and handholding so that day-to-day operation does not depend on one NCW IT officer.
- Provide first-level functional support to NCW users during hypercare and AMC, with escalation to technical staff where needed.
- Maintain documentation sufficient for NCW to understand system configuration, user roles, administrative settings, backups and handover.

9.2 NCW Governance Structure

- NCW shall constitute a small Project Committee which shall give policy, workflow and milestone approvals. Routine coordination may be done by a nominated Nodal Officer.
- Implementation reviews may be held fortnightly. Daily reviews during go-live and critical issue resolution.
- During AMC, monthly review meetings shall normally be sufficient, unless major incidents arise.

9.3 Minimum Technical Team Configuration

The bidder shall include a named project team in the Technical Bid and maintain the minimum team below. One person may hold more than one role only where the qualifications are met and the availability requirements are not diluted. The vendor team shall manage planning, issue tracking, coordination and user support so that implementation does not depend on continuous monitoring by a single NCW IT manager.

Development / Implementation Role	Minimum Deployment	Minimum Experience / Responsibility
Project Manager / Delivery Manager	1 full-time through implementation and hypercare	10+ years in IT project management; single point of accountability; owns plan, issue tracker, risk register, reporting and coordination.
Business Analyst / Domain Lead	1 full-time during discovery, FRS and UAT; part-time thereafter	5+ years; maps NCW workflows, prepares FRS, coordinates user inputs, acceptance checklists and training content.
Technical Architect	1 named resource; part-time through project; available for design reviews	10+ years; architecture, integration approach, security design, database design and technical oversight.
Full-stack / Application Developers	Minimum 3 full-time, including at least 1 senior developer	Develop workflow, UI, APIs, reports, integrations and application defect fixes.
AI/ML/NLP Engineer	Minimum 1 full-time during AI module build; available through UAT and hypercare	AI prompts, guardrails, summarisation/classification/drafting, evaluation and AI issue resolution.
Database Architect	1 named resource; full-time during migration trial, testing and cutover	10+ years; Data mapping, migration scripts, validation, reconciliation and rollback support.
QA / Test Engineers	Minimum 2 during testing/UAT; at least 1 from M3 onward	Functional testing, regression testing, UAT support, defect tracking and release validation.
DevOps / Deployment Engineer	1 named resource from M2; full-time during deployment and go-live	Deployment scripts, environment configuration, logs, release management and coordination with NCW/cloud provider.
Security / VAPT Coordinator	1 named part-time resource	Secure configuration, VAPT coordination, remediation tracking and incident support.
Trainer / Functional Support Coordinator	1 resource from UAT through hypercare	User training, helpdesk process, user manuals, SOPs and first-level handholding.

During go-live, migration cutover and critical defect resolution, the vendor shall ensure immediate availability of the required technical resources, subject to NCW providing necessary access to the NCW-provided infrastructure and external systems.

AMC / O&M Role	Minimum Availability	Responsibility
AMC Service Manager	Named resource; monthly service review and escalation owner	Owns support governance, ticket ageing, release calendar, quarterly reviews and escalation closure.

AMC / O&M Role	Minimum Availability	Responsibility
Functional Helpdesk / Support Executive	Dedicated business-hours support channel; at least 1 support resource on working days	First-level user support, ticket logging, triage, user guidance and coordination with technical team.
Application Support Developer	Named resource; available for fixes and minor releases	Application bug fixes, configuration changes, template/report fixes and minor enhancements within AMC scope.
Database / Reporting Support	Named/shared resource on call	Report issues, data correction scripts approved by NCW, database performance analysis and migration-related support.
DevOps / Deployment Support	Named/shared resource on call; available during releases	Application deployment, log review, backup/restore coordination, app-level monitoring and cloud-provider coordination.
AI / Prompt Support Engineer	Named/shared resource on call	Prompt/template tuning, AI output issue analysis, AI guardrail checks and approved model/API configuration support.
QA / Release Support	Shared resource for each release	Regression testing, release verification and defect retesting before production release.
Security / Patch Support	Shared/on-call resource	Security patches, VAPT remediation, incident support and security advisory implementation.

The AMC team may be shared across clients, but response and resolution obligations in this RFP shall remain binding. The vendor shall disclose the named AMC escalation matrix before transition from hypercare to AMC.

10. Support, SLA and Major Default Framework

10.1 Support Model

- Vendor shall provide helpdesk/contact channel, ticket logging, remote support and issue tracking during hypercare and AMC.
- Support shall cover application defects, configuration support, minor template changes, user support, patching and security updates within the agreed AMC scope.
- NCW shall provide access to cloud console/server/VPN/logs/monitoring information needed for troubleshooting, subject to security policy.
- Issues shall be categorised as Critical, High, Medium or Low. Only Critical and repeated unresolved High issues may lead to major-default consequences.

Severity	Meaning	Expected Response	Expected Resolution / Workaround
Critical	Application is unavailable or a core complaint workflow cannot be used by all/most users due to vendor-side defect.	4 business hours	Workaround within 1 working day; resolution plan within 2 working days.
High	Important function affected for a group of users, but workaround exists.	1 working day	Resolution/workaround within 5 working days.

Medium	Non-critical defect, report issue, template issue or usability problem.	2 working days	Fix in next planned release or within mutually agreed time.
Low	Cosmetic issue, minor enhancement or clarification.	5 working days	Tracked for future release/change request.

10.2 Major Defaults Attributable to Vendor

- Wilful unauthorised disclosure, transfer, misuse or retention of NCW complaint data.
- Material data loss caused by vendor negligence in application development, migration or database scripts, excluding failures of NCW-provided infrastructure/backups.
- Deployment of unapproved AI model/service involving complaint data, or training/fine-tuning on complaint data without written approval.
- Critical application defect solely attributable to vendor that blocks core complaint registration/processing for more than 3 working days after access and infrastructure are available.
- Milestone delay of more than 30 calendar days solely attributable to vendor after excluding NCW-side delays and approved change requests.
- Failure to provide agreed support for more than 5 working days without valid reason during hypercare/AMC.
- Repeated unresolved High defects showing failure to maintain the application after written notice and reasonable cure opportunity.

10.3 Penalty / Cure Framework

- NCW shall issue written notice describing the major default and provide a reasonable cure period, normally 7 working days for operational defaults and shorter for security incidents.
- If the default is cured within the cure period, no financial penalty shall apply; the issue may be recorded for review.
- For uncured major default, NCW may deduct up to 5% of the relevant monthly AMC invoice for that month, or up to 5% of the affected milestone payment during implementation.
- For wilful misconduct, fraud, unauthorised data disclosure or repeated uncured major defaults, NCW may invoke performance security and/or terminate for cause as per contract.
- Aggregate deductions shall not exceed 10% of the total contract value, except in cases of fraud, wilful misconduct or proven data breach caused by vendor negligence.
- The vendor may submit a written explanation/dispute within 5 working days. Disputed deductions shall be reviewed by the Project Committee before final decision.

11. Eligibility and Evaluation

11.1 Minimum Eligibility

Area	Minimum Requirement
Legal Entity	Company / LLP / partnership registered in India with valid PAN and GST.
Non-blacklisting	Self-declaration that bidder is not blacklisted by Central/State Government/PSU.
Financial Capacity	Average annual turnover of at least Rs. 5 crore in IT software during the last 3 financial years; positive net worth in latest audited year.

Government Experience	At least 2 IT projects for Central/State Government/PSU/autonomous body in the last 5 years, with atleast one of value at least Rs. 1 cr.
Relevant System Experience	At least 1 complaint/grievance/case-management/workflow system for government or regulated organisation.
Security	ISO 27001 or equivalent security certification.

11.2 Technical Evaluation Matrix

Only bids meeting the minimum eligibility requirements shall be technically scored. Marks shall be awarded strictly as per the objective slabs below, based on documentary evidence submitted with the Technical Bid. Work orders, completion certificates, audited financial statements, CVs and bidder presentations/demos may be considered. No marks shall be awarded for unsupported claims.

Criterion / Sub-criterion	Max. Marks	Objective scoring formula
1. Turnover	10	Average annual turnover from IT during the last 3 financial years: >= Rs. 10 crore = 10 marks; >= Rs. 7.5 crore and < Rs. 10 crore = 8 marks; >= Rs. 5 crore and < Rs. 7.5 crore = 5 marks;
2. IT project value delivered	10	Highest-value completed IT project (At least 1 in last 3 years with Government of India or CPSU) supported by work order and completion certificate: >= Rs. 7.5 crore = 10 marks; >= Rs. 5 crore and < Rs. 7.5 crore = 5 marks; >= Rs. 1 crore and < Rs. 5 crore = 2 marks;
3. Complaint / grievance / case-management / workflow system experience	5	Government or regulator deployment = 5 marks; Private enterprise deployment = 2 marks;
4. Data handling experience	15	Data Handling experience (records in a single database): =>10 Crore Records : 15 Marks, >5 Crore and < 10 Crore Records : 10 Marks >2 Crore and < 5 Crore Records : 5 Marks
5. API Integration experience	15	API Integration experience of > 100 APIs : 15 marks >50 and < 100 APIs : 10 Marks > 20 and < 50 : 5 Marks
6. Data Authentication and Transfer Experience from Old System to New System	15	Data Transfer From at Least 10 RDBMS Tables with 50 Lakh rows to New Database : 15 Marks >25 Lakh Rows and < 50 Lakh Rows : 10 Marks >5 lakh rows and <25 Lakh Rows : 5 Marks
7. Project Manager (PM)	4	Named PM with 10+ years and at least 1 government/CPSU IT projects = 4 marks; 5+ years and 1 government/PSU IT project = 2 mark;
8. Technical Architect	3	Named Architect with 10+ years and at least 1 government/CPSU IT projects = 3 marks; 5+ years and 1 government/PSU IT project = 1 mark;

Criterion / Sub-criterion	Max. Marks	Objective scoring formula
9. DataBase Architect	3	Named Architect with 10+ years and at least 1 government/CPSU IT projects = 3 marks; 5+ years and 1 government/PSU IT project = 1 mark;
10. Presentation to NCW	20	Understanding of NCW complaint workflow and proposed solution; architecture, security and scalability; AI demonstration and guardrails; migration and implementation plan; support approach, team availability and risk management.
Total Technical Score	100	Minimum qualifying technical score: 70 out of 100. Financial bids of bidders scoring below 70 shall not be opened.

Where a bidder submits multiple project references, marks shall be awarded based on the best qualifying documentary evidence under each sub-criterion.

11.3 QCBS

- Technical score weight: 70%. Financial score weight: 30%.
- Financial Score = (Lowest Financial Bid / Bidder Financial Bid) x 100.
- Combined Score = (Technical Score x 0.70) + (Financial Score x 0.30). The responsive bidder with the highest combined score shall be recommended for award, subject to verification of documents, price reasonableness and approval of the competent authority.

12. Financial Bid

- Bidders shall quote a single consolidated implementation price covering discovery, design, development, migration, testing, VAPT support, deployment, training and 90-day hypercare.
- Bidders shall quote annual AMC/O&M price for each of 5 years separately, or a consolidated 5-year AMC price, as specified on GeM/CPPP.
- Cloud infrastructure, DR infrastructure, bandwidth, storage, backup, cloud monitoring, SMS/email gateway charges and other NCW-provided infrastructure costs shall not be included unless specifically asked by NCW.
- External AI API/model usage cost, if proposed, shall be disclosed separately as a pass-through item with basis of calculation and NCW approval requirement.
- GST shall be quoted separately as applicable.
- Bidders shall quote standard person-day rates for approved Change Requests by role.

Component	Amount (Rs.)	
Development and staging, including hypercare		To be quoted
AMC/O&M Year 1		To be quoted
AMC/O&M Year 2		To be quoted
AMC/O&M Year 3		To be quoted
AMC/O&M Year 4		To be quoted
AMC/O&M Year 5		To be quoted
GST		As applicable
Total		
External AI API/model usage, if any		Pass-through / separate approval

13. Change Requests

- A Change Request (CR) shall be used for scope additions, new integrations, major workflow changes, new reports beyond agreed list, mobile apps or substantial policy changes after FRS sign-off.
- Each CR shall include description, reason, impact on cost/timeline, affected modules and approval by NCW.
- Minor configuration changes, template corrections and bug fixes within the agreed FRS shall not be treated as paid CRs.
- Approved CRs shall extend timeline where necessary and shall not be counted as vendor delay.

14. Exit Management

- At contract end or termination, vendor shall provide source code, database dump/export, documents, deployment scripts, configuration inventory, admin credentials handover and knowledge-transfer sessions.
- Vendor shall support transition to NCW or a new vendor for up to 30 working days as part of exit assistance, unless a longer period is separately agreed.
- All NCW data shall be returned or deleted from vendor-controlled systems, with written confirmation, subject to legal retention requirements.
- System data export shall be available in open formats such as CSV/JSON/PDF and database backup formats.

15. General Terms and Annexures

15.1 General Terms

- NCW reserves the right to accept, reject, cancel or modify the procurement process as per applicable rules.
- All intellectual property in custom-developed source code, configuration, workflows, templates and NCW-specific prompts developed under the project shall vest with NCW, subject to pre-existing vendor tools/components disclosed in the bid.
- The vendor shall maintain confidentiality of complaint data and government information.
- Core development work cannot be sub-contracted. Sub-contracting of non-core work shall require prior written approval of NCW. Prime bidder remains responsible for all deliverables.
- Audits & Security: NCW can inspect security logs, project records, and contract performance on reasonable notice; vendor shall cooperate and fix issues for free. Access shall be role-based, revoked immediately upon exit, and live production data shall not be copied to test environments without approval and masking.
- Ending the Contract: NCW can terminate with 15 days' notice for serious breaches (like fraud or data leaks)—or even faster if data is at risk. NCW can also terminate for convenience with 30 days' notice, paying only for accepted work completed up to that date.
- Indemnity: The vendor shall defend and protect NCW, its officers, and its staff from all losses, claims, damages, or legal fees caused by your actions. This includes instances of contract breach, copyright or patent infringement on deliverables, data breaches, personal injury or property damage caused by vendor's team, and any violations of the law.

Annexure A: Technical Bid Checklist

- Bid Submission Form and Undertaking in Annexure C, duly signed by the authorised signatory.
- EMD instrument/proof or valid exemption certificate, as applicable.
- CA-certified audited financial statements for the relevant years.
- Covering letter and acceptance of RFP terms.
- Legal documents, PAN, GST, audited financial statements and non-blacklisting declaration.
- Project experience documents and client certificates/work orders or any other legitimate proof of the work done.
- Solution approach, architecture, AI guardrails, migration approach and project plan.
- Key personnel CVs and team structure.
- Security certification.
- Compliance sheet against this RFP.

Annexure B: Compliance Sheet

RFP Clause	Complied (Yes/No)	Remarks / Deviation
Scope of Work		
AI Human Control		
Hosting by NCW		
Security Certificate		
Implementation Timeline		
Support and Major Default Framework		
Data Residency and Confidentiality		
Bid Submission and Validity		
EMD and Performance Security		
Payment Terms		
SLA, Liquidated Damages and Penalties		
Termination, Dispute Resolution and Exit		

Annexure C: Bid Submission Form and Undertaking

To,

National Commission for Women,
New Delhi

Subject: Bid for AI-Assisted Complaint Management System - Tender Reference No. 12-2/1/2026-Computer Cell (NCW)

We, the undersigned bidder, having examined the Bid Document and all corrigenda, offer to perform the complete scope at the prices quoted in the Financial Bid. We confirm that:

- our bid shall remain valid for 180 days from the last date of bid submission;
- we meet the mandatory eligibility requirements and the documents/information submitted are true, complete and verifiable;
- we accept the Bid Document without condition except deviations expressly listed in our Technical Bid;
- we are not blacklisted/debarred/suspended as declared, and we have disclosed all actual or potential conflicts of interest;
- we shall furnish Performance Security and sign the contract within the prescribed period if selected;
- our prices include all costs necessary for complete performance except items expressly identified as NCW-provided or approved pass-through items; and
- we understand that NCW is not bound to accept any bid and may act in accordance with applicable procurement rules.
